**DETAILED ACTION**

***Response to Amendment***

1. Amendment filed March 9, 2010, forms the basis for this Office action. Claims 55 and 56 are pending.

***Drawings***

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "axis" of the core barrel must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner,

the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Claim Objections***

3. **Claim 55** is objected to because of the following informalities: the wording "the support surfaces) (second line from below) should be replaced by "the bearing surfaces". Appropriate correction is required.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. **Claim 56** is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The newly introduced limitation "configured to deflect from an original configuration... and return to the original configuration" is an extreme version of the term "resiliently deformable" in that the implied resilience is even claimed now to be 100 %. Therefore, the claim amendment introduces new matter.

### ***Allowable Subject Matter***

5. **Claim 55** would be allowed if the objection as set forth above in section 3 were overcome by amendment as specifically required in section 3. The following is a statement of reasons for the indication of allowable subject matter:

Applicant's argument of traverse based on the absence of a disclosure in the prior art of record of all features of a roller element as asserted on page 15 of Remarks is persuasive. An update search based on the substantial amendments has yielded related art Thorp II (US 3, 554,868). A single vertical support as currently claimed in claims 55 and 56 is disclosed in Thorp II (US 3,554,868), teaching a core barrel 17 with side wall 17 and top 19 and bottom 18, vessel 10, upper and lower support members 42 and 43 with downwardly and upwardly disposed contact surfaces (between 42 and 43) capable of transmitting vertical loads. However, Thorp II does not teach the lateral support means of claim 55, nor of claim 56.

#### ***Response to Arguments***

6. Applicant's arguments filed March 9, 2010, have been fully considered but they are not entirely persuasive of full patentability because of the introduction of new matter in claim 56, as set forth above in section 4. However, claim 55 would be allowable if an objection as set forth in section 3 because of a minor informality is corrected in the manner indicated. See section 5. Minor informalities, both in the Drawing and in claim 55, are brought to the attention of applicant.

#### ***Conclusion***

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
